04:30:00	Living in the Overlap	NETA	(S)	(CC)	N/A	#0H
	Living in the Overlap is the improbably true story of two girls growing up in Brooklyn in the 1940s, falling in love in the Midwest, and making a life together in North Carolina. Filmmakers learned about Lennie Gerber and Pearl Berlin's 46-year love story from a newspaper article and wanted to share their philosophy of relationships and their vibrant personalities with a larger audience. Lennie is an attorney focusing on LGBT issues, and Pearl is a retired professor working on various political issues. They are surprised to have reached icon status for simply living their lives together. The film includes public and private moments in Lennie and Pearl's lives using interviews, archival material, and sequences shot during their efforts to defeat North Carolina's anti-gay marriage amendment. Living in the Overlap provides an overview of how Lennie and Pearl met and fell in love before focusing largely on key episodes in their lives together now. They are recent recipients of a major award from a foundation supporting LGBT issues, an award presented at a formal gala. Despite strong efforts against the measure, the amendment passed, and they appeared on The Last Word With Lawrence O'Donnell after the election. Along with reflections and insights about civil rights and the political process, they offer wisdom about enduring relationships, including an overarching philosophy of their relationship. They think of themselves as two circles, often overlapping, who are both independent and interdependent. After 46-years of living in the overlap, Lennie and Pearl still have an indelible spark.

09:00:00	Wyland's Art Studio Lion	APTEX		(CC)	N/A	#503H
	For centuries, artists have employed light and shadow for a theatrical effect. The technique, known traditionally as chiaroscuro, refers to a strong juxtaposition of light and shade to enhance the dramatic aspects of a painting. The technique was pioneered and used to heightened effect by Leonardo da Vinci, Caravaggio, and Rembrandt. In this portrait of a regal lion, Wyland uses the interplay of shading to establish dramatic and dominant nature of these beautiful apex hunters. First, Wyland pays singular attention to his light sources and creates the painting from there, establishing lines, mid tones, then adding strong shadows. The light source is the single most important aspect of chiaroscuro painting. Highlights that have a bit of color from the light source may be added. If the light source is cool, highlights may include a variety of blue colors. If the source is warm, yellows, oranges or reds may be added.

<p>Not Without Us follows seven grassroots activists from around the world to the 21st U.N. Climate Talks in Paris. The effects of climate change on their lives reveal what's at stake if a strong agreement to limit carbon emissions is not reached. Yet, the landmark Paris Accords, signed by 195 nations, is non-binding and fails to mention the main cause of global climate change: fossil fuels. Not Without Us connects the dots between the inability of the U.N. process to address climate change and Big Oil's control over governments, between the economic inequality and the oncoming climate disaster, and between a fossil fuel driven economy and the 1% who control it. Not Without Us demonstrates the importance of grassroots groups to empower mass movements to create systemic change.</p>

Actor/comedians Nick Kroll and John Mulaney discuss their popular comedy Oh, Hello on Broadway, which features two 70-something, down-on-their-luck bachelor characters that John & Nick have been developing over the years in clubs, on TV and Off-Broadway. Next, we host a conversation on Shear Madness with its creators Marilyn Abrams and Bruce Jordan (also director of the production), plus the show's NYC leading man, Jordan Ahnquist. Thirty-seven years ago, Marilyn and Bruce acquired the rights to a gravely serious German play Scherenschnitt, in which the audience helps solve a murder mystery. They adapted it, initially for themselves to star in, keeping the crime and the audience participation, but adding campy characters, improv and constantly-updated topical jokes. The result is Shear Madness, now the longest-running play in the USA with productions staged all over the world.

	<p>Unity, balance and movement are the basis of a carefully composed painting. A range of artistic decisions proceeds first from the identification of a focal point. Then, the artist may employ a range of contrasts between light and dark to find a rhythm that supplies a unique energy to the artwork. Used effectively, elements of composition provide a structure that leads the viewer's eye in a particular way for a variety of different effects. "Starry Night" by Vincent van Gogh is an excellent example of extraordinary composition. The parts of the composition may feel as if they belong together. Or they may be purposely disjointed. A symmetrical arrangement may add a sense of calm. Whereas an asymmetrical arrangement may create a sense of unease. By adjusting the arrangement of the objects, the artist can create a sense of motion or still life. Patterns establish an underlying structure of basic lines and shapes. Proportion is the way in which things fit together, big and small, nearby and distant. Each of these components may be used in varying degrees to create the intended effect.</p>

	This show highlights the conviviality of a South American cookout, which can last through the day and well into the night, with different courses served for hours on end. Add some dishes from this multi-cultural continent to your grilling repertoire. For years, North Americans have attempted to recreate the spicy spit-roasted pollo served in Peruvian enclaves like Washington, D.C. and Los Angeles. The secrets to the marinade and special sauce will be revealed in this episode. Little known in the U.S. is choripan, a kind of Andean hot dog that can be served as an appetizer at an asado or as a belt-loosening main course. The meat-centricity of a Brazilian churrasco will be on full display as we spit-roast picanha (top cap sirloin), chicken thighs, kielbasa, peppers, and onions-all served with an electrifying Brazilian country-style salsa called molho a campanha. Peruvian roast chicken with aji amarillo sauce; Choripan; Brazilian churrasco (mixed grill) with molho a campanha.

17:30:00	Growing A Greener World Saving Seeds for Future Generations: Seed Savers Exchange (Decorah, Ia)	APTEX	(S)	(CC)	N/A	#710H
	Few people realize that less than 10% of all seed varieties commonly grown in 1900 are still with us today. They're extinct-gone forever, because no one took the time to preserve them for future generations. That risk is even greater today thanks to the genetic manipulation of a relatively few remaining seed varieties, combined with the massive buying up of smaller seed companies by overseas giants. The mission of protecting, preserving, and sharing today's precious seed and heirloom varieties has never been more important. Thankfully, one company established to do just that is alive and well, and since 1975 has been thriving in their efforts to preserve horticultural diversity. Seed Savers Exchange has an active international membership of over 13,000 who are helping with the cause. In this episode, Joe makes a trip to Iowa to their scenic 890-acre Heritage Farm to learn more about their process as well as the risks and challenges of safeguarding today's precious seed varieties for future generations.

Magnificent, mesmerizing and memorable as can be, it can only be Julie making manoush, Lebanese breakfast dough pies with her Mama in the morning. As soon as the thought of manoush comes to mind, Julie immediately envisions her mother. Ever since she was a little girl, Julie grew up to the sights, sounds and scents surrounding her as her mother would be making and baking manoush on their family's saj (an authentic outdoor Lebanese oven) signaling Sunday mornings. Julie may be all grown up now but her senses still remain the same, meaning manoush plus Mama, equals magnificent. Today, Julie is making one of the most famous manoush of all time, manoush bi zaatar, Lebanon's most brilliant breakfast food. These Lebanese personalized dough pies are topped with the Lebanese signature spice blend called zaatar, an earthy and zesty thyme herb mixture made up of wild zaatar (or Greek oregano) thyme, sumac spice, sesame seeds and sea salt that is simply irresistible, making for a scrumptious way to start your day. Julie also shows you how to simply make homemade yogurt right at home called laban which is unstrained, smooth and silky then teaches you how to transform it into labneh which is strained, thick and creamy yogurt. Last but certainly not least no morning would be quite complete without a small demitasse cup of authentic Arabic coffee called ahwa, and this strong stuff is sure to keep you going all day long. Julie and Mama bring you outside to the veranda for a special treat for you to see their saj in action showing you how to make and bake Lebanese bread on their authentic Arabic outdoor oven that is rarely seen in the States today. 	COUNTING FROM INFINITY: YITANG ZHANG AND THE TWIN PRIME CONJECTURE centers on an exciting string of mathematical discoveries. It began in April 2013 when Yitang "Tom" Zhang, a virtually unknown mathematician working as an adjunct professor at the University of New Hampshire, submitted a paper to the Annals of Mathematics. Zhang had made an important breakthrough in Number Theory by solving the Twin Prime Conjecture (pairs of prime numbers that differ by two). His work, Small Gaps Between Primes, was immediately recognized as an important mathematical breakthrough, and Zhang became an instant celebrity - a role for which he was unprepared. The film documents Zhang's quiet perseverance amidst adversity, and his preference for thinking and working in solitude. Zhang's story is interwoven with a history of the Twin Prime Conjecture as told by several mathematicians, many of whom have wrestled with this challenging problem: Daniel Goldston, Kannan Soundararajan, Andrew Granville, Peter Sarnak, Enrico Bombieri and James Maynard. By chronicling the series of rapid developments around the twin prime problem in 2013, and the many individuals who contributed to it, the film offers a glimpse at how mathematics progresses. A snapshot of a great moment in mathematical history, COUNTING FROM INFINITY is at once a biographical portrait of a unique individual and the exciting story of his discovery.

<p>Wildlife and nature films are a hugely popular entertainment genre: networks such as Animal Planet and Discovery are stars in the cable television universe, viewers flock to IMAX theaters to see jaw-dropping footage from the wild, and the venerable BBC still scores triumphs with series such as Planet Earth. As cinematic technology brings ever-more-breathtaking images to the screen, and as our direct contact with nature diminishes, an ever-expanding audience craves the indirect experience of wild nature that these films provide. But this success has a dark side, as veteran producer and film educator Chris Palmer reveals in the documentary Shooting in the Wild. Based on his authoritative and engrossing book of the same name, Shooting in the Wild presents an insider's look at the business of wildlife filmmaking, uncovering a more pervasive and troubling trend toward sensationalism, extreme risk-taking, and even abuse in wildlife films. Illustrated with film clips from the early days of the genre to the present, this program also profiles a new breed of skilled, ethical filmmakers whose work enlightens as well as entertains, and who represent the future that Palmer envisions for the industry he loves. The host of the program is Alexandra Cousteau, who is herself a filmmaker and National Geographic "Emerging Explorer," and the granddaughter of Jacques Cousteau, the underwater film pioneer.</p>

Animal portraits provide a wonderful opportunity to incorporate techniques of broken color as Wyland so aptly demonstrates in his portrait of a mother and baby Koala basking in the afternoon sun. 18:30:00	Americas Now Brazil - Syrian Refugees Venezuela Brazil - Syrian Refugees Venezuela (Gerry Hadden) - As European countries squabble over how many refugees from the Syrian war to take in, an unlikely and far-away country has already opened its doors: Brazil. "The Giant of the South" has taken in over 2000 Syrians, and has plans for 20-thousand more this year. The country is fast-tracking their visas, making it an easy and safe destination. However, many Syrian refugees know very little of Brazil. Mexico - game Changer Bico Yubo (Lisa Hagen) - Violence has forced "many" in parts of Mexico -- to limit their time outdoors and stay at home. In the southern city of Juchitan...motorcycle taxis are the main means of transportation. They're also used as a tool in committing crimes...like assaults and robberies. But a group of young, indigenous artists...is using the vehicle to carry culture to remote communities. It's the first of its kind in Latin America...a taxi filled with library books, movies and music for people who don't have access to those resources. Meet this week's Game Changer Rodrigo Vasquez. Finally - Americas Now takes viewers in this video essay to Monserrate Mountain, the scenic mountaintop which overlooks Bogota Colombia and is home to a remarkable 377 year old cathedral. Valadez searched for the remains of Joaquin Murrieta, a legendary Mexican outlaw who blazed a trail of revenge across California until he was caught and decapitated in the summer of 1853. A hundred and sixty-two years later Valadez believes he has the head. So he embarks on a quixotic, cross-country road trip through history, myth and memory to bury the fabled head of Joaquin Murrieta. Along the way he discovers chilling parallels with his own family story and eventually realizes that the head he will bury is only symbolic. And yet its power as a metaphor remains. Using new ground breaking scholarship and working with a team of leading historians from across the country, The Head of Joaquin Murrieta provides a dissenting view of American history from a decidedly Chicano perspective. Deeply personal, irreverent and entertaining, the film tears open a painful and long ignored historical trauma that has never been explored on American television: the lynching of Mexican Americans in the west.

	<p>VISA DREAM tells the touching story of one family's experience gaining entry into the United States. Representatives from the U.S. Consulate demystify the visa process and illuminate the reasons why they approve some applications - and deny others. The film's main characters are Ramon and Aurora Chavez, an elderly couple living in Jalisco, Mexico, who have not seen their children in 16 years. They are a family divided, connected only by photo albums and phone calls. The daughters may not visit Mexico because they do not possess the necessary documents; going there would mean forever leaving behind their spouses, children, homes and lives. One daughter tearfully explains the hardships many immigrant families endure as a result of this prolonged separation. Ramon, the patriarch of the family, would rather live in Mexico but he longs to reunite with his family, who live 2,500 miles away in Los Angeles. In order to visit, they must secure a tourist visa, an expensive and difficult proposition. Previous attempts proved unsuccessful but the Chavezes decide to try again after years of postponement. A camera crew follows them step-by-step through the application process, which begins at the U.S. Consulate two hours away in Guadalajara. There, visa document specialists and a U.S. Consulate officer describe their roles, detail the reasons why certain individuals receive visas while others do not and explain what their interview questions aim to reveal. VISA DREAM's closing moments capture the tension as the family eagerly awaits the results of the interview. Jubilant scenes follow as the family responds with shock, tears and excitement when they hear the decision. The film concludes with Ramon and Aurora's first trip to California and the heartwarming reunion with their children and grandchildren.</p>

	Green roofs are gaining popularity in commercial and residential design, offering a nearly untapped, limitless space to plants perennials, shrubs, even trees. They also cool the air in and above our homes and offices, absorb carbon dioxide, return oxygen, reduce runoff, filter pollutants and provide habitats for birds and other wildlife. They even offer a welcomed respite for mind and body. In this episode, we get a rare, behind the scenes tour of the famous rooftop gardens at Chicago's city hall. We also visit Lurie Garden at Chicago's Millennium Park, and demonstrate how to implement a smaller homegrown version. In the kitchen, Chef Nathan uses one of the most common roof top vegetables, the tomato, to create a delicious meal.

23:00:00	Jeremiah	NETA	(S)	(CC)	N/A	#0H
	On July 18, 1965, U.S. Navy Commander Jeremiah Denton took off from the aircraft carrier USS Independence leading a 28-plane mission over the city of Thanh Hoa in North Vietnam. Denton's plane was hit by anti-aircraft fire during the attack, and for the next eight long years, he would battle the North Vietnamese as a prisoner of war in the infamous Hanoi Hilton. As the senior American officer at the prison, Denton was forced by the North Vietnamese to participate in a press conference and told he must say the POWs were being treated well. Looking haggard, weak and beaten from the severe punishment he had undergone, Denton took advantage of that opportunity however, to send a secret message home, blinking out the letters T-O-R-T-U-R-E in Morse code. In this new APT original film, JEREMIAH, family, friends, and fellow POWs help tell the story of this American hero who led the way for prisoners in Hanoi and returned from Vietnam to become a U.S. Senator from Alabama. Six of Denton's children are interviewed: Jeremiah III, James, Don, Mike, Mary and Madeleine. Robert Shumaker, James Mulligan and George Coker were part of the Alcatraz Eleven, a group of hardline resisters including Denton that the Vietnamese removed from the Hanoi Hilton and sent to a worse prison that the POW's named Alcatraz. Other interviewees include Senate staffer Joel Lisker, who worked for Denton; Alvin Townley, author of Defiant; and Heath Hardige Lee, who is writing a history of the POW wives and the POW/MIA movement. JEREMIAH also tells the story of what was happening back home to Denton's wife, Jane, and their seven children, who wondered if he would ever return as they faced the turbulent social changes of the 1960's. Jane Denton managed to overcome her grief at her husband's imprisonment by becoming an activist and helping to start the POW/MIA Movement which was partially responsible for the Vietnamese ending their program of torture. JEREMIAH explores the power of faith in unbelievable circumstances, and the qualities of leadership Jeremiah Denton brought to the difficult task of guiding fellow POWs to survive years of imprisonment and torture. In the end, it leaves no doubt that Denton was "a hero among heroes."

Soft brushes are useful for smooth finishes and softer lines. Wyland demonstrates a variety of brush techniques to create an abstract tropical sunset painting. By 1941 there wasn't enough food for the family so Cecilia and her number five sister (she had nine in total), fled on foot through Japanese occupied territory. They walked more than 1,000 miles and it took almost six months to reach the safety of "Free China." In this episode, Cecilia joins Laurence Jossel, chef and owner of Nopa. Like Cecilia, South African-born Jossel came a long way to open a restaurant in San Francisco. In the last quarter of the 19th century, artists from Paris escaped the uncomfortable heat of the Parisian summers by train to the surrounding villages along the Seine to form art colonies. The American artists formed a well-integrated colony in Giverny and explored an American style of Impressionism that was then exported to the United States at the turn of the century. David will explore the similarities and differences between French Impressionism and American Impressionism as he paints on the hillside above Giverny, popular with Theodore Robinson and Willard Metcalf.

20:00:00	Infinity Hall Live Wilson Phillips	APTEX	(S)	(CC)	N/A	#102H
	<p>Wilson Phillips, one of the biggest selling all-female groups in music history hits the Infinity Hall stage for an unforgettable night of nostalgia and chart-topping songs. The group, made up of Chynna Phillips, Wendy Wilson and Carnie Wilson, first reached the top of the Billboard charts in 1991 and have seen a resurgence in the past year with their appearance in the hit film Bridesmaids and their new reality series, Wilson Phillips: Still Holding On. Another reason for their return to center stage? They have a hit record! Their new CD, Dedicated, - which has topped the Amazon contemporary pop vocal charts - is a tribute to the music of their iconic parents; Chynna is the daughter of Michelle and John Phillips of the Mamas and the Papas and Wendy and Carnie are the daughters of the Beach Boys' Brian Wilson. Displaying the same tight, lush harmonies their parents were known for in their music, Wilson Phillips gives these beloved songs a new appeal in this intimate concert sure to pull on the heartstrings of multiple generations. The group opens the INFINITY HALL LIVE concert with their #1 chart-topping ballad "Release Me," much to the delight of the crowd, but soon they kick off their high heels and get comfortable singing the nostalgic harmony-rich songs of their extended musical families. From the Mamas and the Papas repertoire, Wilson Phillips performs "12:30", "Monday, Monday" and the song that inspired the Dedicated CD, "California Dreamin'". Carnie Wilson explained, "Last year we were at a private party and decided just for the party to sing 'California Dreamin'". After we sang that together, our manager asked 'What do you think about doing a cover album of the Mamas and the Papas and the Beach Boys?' I said 'When do we start?'" Fans of the Beach Boys won't be disappointed either as the group covers some of their most best-loved songs. From "God Only Knows" and "In My Room" to "Wouldn't it Be Nice," Wilson Phillips' performance of these tunes full of intricate, gorgeous harmonies gives them a fresh new tenderness. And it's a true family affair with Carnie's husband Rob Bonfiglio on guitar and Matt Jardine, the son of Beach Boys founding member Al Jardine, singing back-up vocals. Though the ladies of Wilson Phillips have grown up, married and now have nine children between them, they can still bring the house down with their most iconic hit song "Hold On," which serves as their INFINITY HALL LIVE finale.</p>

The railway tracks are some of the oldest and longest you'll find anywhere in the world, and train travel doesn't get any tougher than this in a country with a population of over 1.2 billion. Indian Railways operations cover 29 states and seven union territories. It's now the world's fourth largest railway network, comprising 71,000 miles of track over a route of 40,000 miles.</p>
